Education

Saint Petersburg State University

St. Petersburg, Russia, 2025

Bachelor's Degree in Applied Mathematics and Computer Science

Technical skills

Mathematics: econometrics, probability theory, mathematical statistics, linear algebra, mathematical analysis;

Languages: Python, C++, SQL (Postgres), R, Bash;

Frameworks: PyTorch, Scikit-Learn, MLFlow, Apache Hadoop, Apache Spark, Aiogram;

Libraries: pandas, NumPy, SciPy, seaborn, NLTK, Transformers, SQLAlchemy, statsmodels;

Developer Tools: Linux (Arch, btw), Git, Docker, BI systems (DataLens);

Commercial Projects

Telegram Bot powered by AI models | *Python, Aiogram, PostgreSQL, Docker, DataLens*

- Using *Aiogram* and *OpenAI API*, created a web application that allows clients to interact with advanced generative AI models;
- Set up *Yandex DataLens* for aggregation, visualization, and analysis of user statistics to execute statistical experiments and enhance service quality;
- Integrated *PostgreSQL* database, which significantly improved the reliability and scalability of the project;
- Designed and implemented a microservices architecture using *Docker Compose*, which reduced the project deployment time on a new server to 1 minute;
- Configured *Nginx* as a reverse proxy to receive events via webhook, which doubled events processing speed;

Non-commercial Projects

Evaluating the effectiveness of continual learning with KAN | *Python, PyTorch*

- Modified and implemented the KAN neural network architecture;
- Developed methods to mitigate catastrophic forgetting, adapted for the new architecture;
- Created a software framework for scalable continual learning experiments;

Genetic algorithm for reduction and approximating the Pareto Set | *Python, SciPy*

- Programmed a process of reduction of the Pareto set that uses a finite collection of information quanta;
- Considered and compared existing methods for Pareto set approximation;
- Adapted a genetic algorithm for usage in the iterative reduction process;

Participation in Competitions

Participant in the [Backdrop Build competition](#) in the «AI» category with the [chxxxxbot](#) project. 2024

Participant in the [E-CUP 2024 hackathon](#) from Ozon Tech as a Data Engineer. 2024

Additional skills and knowledge

English level: *Upper Intermediate (B2)* | [Saint Petersburg State University Certificate](#) 2022

Mathematical Statistics | [Computer Science Center Certificate](#) 2023

Mathematical Analysis | [Computer Science Center Certificate](#) 2023

Linear Algebra | [Computer Science Center Certificate](#) 2024

Probability Theory | [Computer Science Center Certificate](#) 2024

Introduction to Competitive Data Science | [Stepik Certificate](#) 2024
